

SPEED was founded by student participants of the 1st Global Student Forum (GSF) in October 2006 during the 5th Global Colloquium on Engineering Education (GCEE), organized by the American Society for Engineering Education (ASEE), in Rio de Janeiro, Brazil.

The following years, **SPEED** co-organized the 2nd and the 3rd GSF with ASEE in Istanbul, Turkey and Cape Town, South Africa, and it went on with great success in the upcoming years:

- ✓ **4th GSF**, Bhubaneshwar, India in 2008
- ✓ **5th GSF**, Saint Petersburg, Russia in 2009
- ✓ **6th GSF**, Budapest, Hungary in 2009
- ✓ **7th GSF**, Singapore in 2010
- ✓ **8th GSF**, Buenos Aires, Argentina in 2011
- ✓ **9th GSF**, Columbia in 2012.
- ✓ **10th GSF**, Dubai in 2014.
- ✓ **11th GSF**, Italy in 2015.
- ✓ **12th GSF**, Korea in 2016.

SPEED hopes to expand the Global Student Forum initiative significantly in the coming years through global cooperation and feedback from students and through other activities to further enrich engineering education curricula worldwide.

WHO CAN JOIN?

Any current student interested in affecting change in the way engineering education is delivered is welcome in **SPEED**. We have had students at various stages in their academic careers: undergraduates, masters, doctoral, and post-doctoral studies. Members can be from any discipline of engineering studies (civil, computer, biotechnology, design, etc.), as well as from other fields (education, for example) whose interests in the issues we discuss were highly relevant. Further, we have students from myriad countries. We take pride in the variety of perspectives these students bring to our discussions, and we firmly believe the concrete outcomes we strive for are more well-informed because of the diversity of our participants.

We had been constantly working to provide students a platform to voice their EE challenges, engage in EE dialogues and foster best practices in EE. We are looking for opportunities to collaborate and closely work with EE organizations, industries and universities to expand our student reach and expand our initiatives.

The workshop aims on creating skill development opportunities like you learn communication skills, leadership skills, problem solving skills and decision making which will help you individually & personally throughout your future. **SPEED** is not only a place where you come and do certain things but also to acquire and learn the skills which will help you to build your career.

SPEED give you international online connections like if you attend Indian Student Forum (ISF) or Global Student Forum (GSF) you have an opportunity to meet diversified students even at RSF you have an opportunity to meet various people from different colleges. More Global, National and Regional Student Forums are coming in the future. Right now looking at Indian Student Forum is a success, the certain places and certain countries are replicated. Countries like Austria, Australia, Columbia, Malaysia and Argentina are organizing the National level student Forum likewise our Indian Student Forum.

By conducting Regional student forums, we are connecting student and management. By conducting ISF we are connecting student and industry. By conducting GSF we are connecting student with international exposure. Students create an action plan during the workshop based on the theme of the workshop and work accordingly with students of

different colleges and states, and develop their networking with them in the process. An action plan can be a project concept, or an idea generated by the activities and the brainstorming sessions which are carried out during the three-day event. Learn new concepts that is what we are going to do because every action plan developed here will be addressing a new concept.

Thinking outside the box is basic fundamental of SPEED and which we will introduce through activities.

SPEED provides:

- Human Resources
- Connections
- Networking
- Fundraising
- Innovation
- Knowledge
- Skills
- Motivation
- Friends!!!

Join SPEED make a difference!!
